

Innovative Piping Systems

Company Introduction

With hands-on experience in the polymer piping industry in New Zealand since the early nineties, UPG Pipe Systems imports, manufactures and supplies a wide range of piping systems for both fluid and gas transfer. Privately owned and operated, UPG has retained its independence and flexibility; this provides customers with the guarantee of excellent service & technical expertise, along with ensuring inspiration, leadership, flexible decision making and accountability throughout the company.

Products

Manufactured primarily from Polyethylene and Polypropylene thermoplastics, UPG's products incorporate the most innovative and advanced pipe system technology available.

In an increasingly dry climate, pipeline integrity is of the utmost importance for water conservation.

Built on nearly 50 years of industry research and innovation, our systems have a track record of exceptional performance and durability in many demanding applications. We can provide engineers and contractors with high integrity and cost effective, fully certified solutions.

Advantages include fusion welded jointing, non-corrosive materials and flexibility; in addition to a vast range of sizes, pressure ratings and fitting options.

Polyethylene's toughness, immunity from corrosion, excellent resistance to chemicals and light weight has contributed to its continued appeal for use in situations where cost-effective and reliable systems are required.

UPG's extensive product range includes:

- PE100 Polyethylene pressure pipe & fittings
- PE100 Polyethylene pipe & fittings for sewerage systems
- HDPE drainage pipe & fittings for trade waste
- Compressed air and vacuum piping systems
- PP-R Pipe & Fittings for hot & cold water reticulation
- Full range of control & process valves
- Steel backing rings & dress sets
- Fabrication services
- Tooling & onsite training

Market Orientated

Our systems are used in a wide range of applications including:

- Plumbing & Drainage
- Mining and industrial
- Civil, energy and infrastructure
- Electrical and telecommunications
- HVAC and mechanical services
- Irrigation

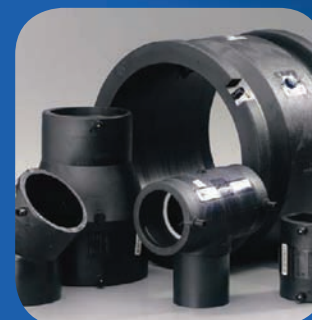

Customer Focus

When you employ UPG, you employ a team of experienced professionals who are dedicated to adding value to your business. With a huge inventory and our own dedicated supply management team, we are committed to extreme customer service.

We place the utmost importance in meeting the needs of our customers, from technical assistance during design stage, through to constantly evolving our extensive product portfolio to meet the needs of the market.

We also place particular emphasis on comprehensive training in the use of our products, to ensure that every installation is trouble free.

Contact the team at UPG today to talk to the experts in pipeline solutions. Find out how we can add value to your business.

Our Vision

To be first preference pipeline supplier to our customers

Our Mission

- To provide the pipeline industry in New Zealand with systems of the highest quality, integrity and innovation
- To provide outstanding service, training and technical support to our customers, and in that way be considered as an essential supplier to their enterprises
- To encourage forward thinking and innovation
- To continuously improve our performance
- To maintain a comprehensive stock holding to ensure that every project runs smoothly
- To put our values at the centre of everything we do, now and in the future
- To protect New Zealand's environment by using 'green' rated, fully recyclable, environmentally friendly materials

Our Values

- We base the relationships we have on Trust and Integrity
- We believe good Communication is essential to a successful business, with our team, our suppliers and, most of all, with our customers
- We focus on providing Quality in all aspects of our business
- We believe in adopting a Caring approach to people and the environment
- We take Pride in everything we do, and the way we do it
- We will always put Safety first

Expertise • Integrity • Capacity

Our systems are used in a wide range of applications including ...

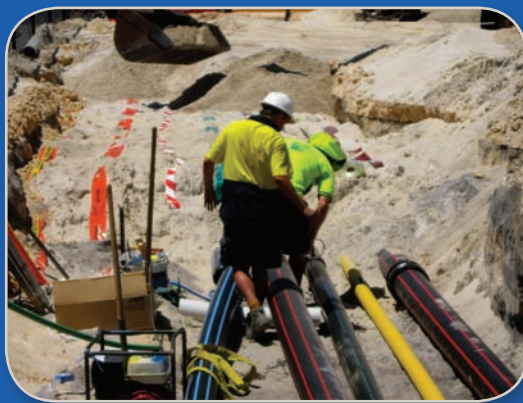

Plumbing

Mining
