

PATCHMASTER MULTI

Ultimate Solutions.
Intelligent Delivery.

COMMENTS

The PatchMaster Multi offer the solution for the removal of the outer surface of PE pipe, in preparation for electrofusion welding of a top-tee or branch saddle fitting.

The PatchMaster Multi offers a variable tool, suitable for a range of different sizes of PE pipe. Designed to be user friendly and ergonomic. All units have long-life blades.

KEY FEATURES

- Simple to fit and operate
- Large pipe range capacity
- Four sided long-lasting TCT blade
- Consistent scrape depth
- Robust steel design
