

RITMO PIPE REROUNDERS

250MM - 800MM

Ultimate Solutions.
Intelligent Delivery.

● **COMMENTS**

The mechanical thread of these steel-made products help remodel the ends of ovalised pipes that need to be welded by electrofusion.

The manual clamping of the tool stems pushes the ovalised end till its reshaping respects the ovalisation range required by most standards, therefore allowing its insertion into an electrofusion coupler - and avoiding the cost of eliminating a good pipe. The 3 rerounders cover the following diameters range: 250-400 model for OD from 250 to 400 mm; 450-560 model for OD from 450 to 560 mm, and 630-800 model for OD from 630 to 800 mm.

Each one of them is sold separately, with a steel transport box. (For model 450 - 560 and 630 - 800 come with a steel case with 2 wheels).

CARRY CASE

TECHNICAL FEATURES

MODEL	Rerounders 250 - 400	Rerounders 450 - 560	Rerounders 630 - 800
Dimensions	610 x 255 x 120 mm	980 x 495 x 200 mm	1240 x 555 x 200 mm
Weight	27 Kg (59.5 lb)	41 Kg (90.4 lb)	60 Kg (132.3 lb)
